ISVLSI
2024

CALL FOR INDUSTRY FORUM PAPERS/TALKS
www.ieee-isvlsi.org

July 1 - 3, 2024
Knoxville, TN, USA

The 2024 Symposium explores emerging trends and novel ideas and concepts covering a broad range of topics in the area of VLSI: from VLSI circuits, systems and design methods, to system level design issues, to bringing VLSI design to new areas and technologies such as nano- and molecular devices, security, artificial intelligence, and Internet-of-Things, etc. Future design methodologies and new EDA tools are also a key topic at the Symposium. Over three decades the Symposium has been a unique forum promoting multidisciplinary research and new visionary approaches in the area of VLSI, bringing together leading scientists and researchers from academia and industry. The ISVLSI proceedings will be indexed in the IEEE Xplore Digital Library.

CALL FOR INDUSTRY FORUM PAPERS/TALKS

The ISVLSI 2024 is inviting submissions for an industry forum session, where experts, researchers, and stakeholders working on VLSI and emerging technologies are encouraged to present on emerging problems, or recent technical trends in computer architecture, IoT systems, security, artificial intelligence, machine learning, edge intelligence, data analytics, autonomous systems, or any other relevant topic that would be of interest to ISVLSI participants.

- Each speaker at industry forum session has to submit a 1-2 pages extended abstract for inclusion in the conference proceedings.
- Accepted extended abstracts will be included in the conference proceedings. The ISVLSI proceedings will be indexed in the IEEE Xplore Digital Library.
- All extended abstracts will be reviewed before being published in the official proceedings of the conference in a separate track.
- The online submission system (<https://easychair.org/conferences/?conf=isvlsi2024>) will be used for review of the extended abstracts.
